TABLE OF CONTENTS

(Volume 20)

JANUARY

Editorial – 1
Thomas Young's Place in the History of the Wave Theory of Light – Henry Crew 3
Television in Colors by a Beam Scanning Method – Herbert E. Ives and A. L. Johnsrud 11
The Measurement of Gloss – A. H. Pfund 23
Atomic Resonance Radiation in Potassium Vapor – J. Rud Nielsen and Norman Wright 27
Reviews – 31
Note – 33

FEBRUARY

Thomas Young, the Man and Physician – Horatio B. Williams 35
Factors Influencing the Speed of Intensifying Screens – Frank E. Swindells 51
An Apparatus to Measure Color Temperature of Incandescent Lamp Filaments – Clayton H. Sharp 62
Photoconductivity in Dielectric Liquids – Willard H. Eller 71
Infrared Transmission of the Flesh – C. Hawley Cartwright 81
Reviews – 85

MARCH

Spectral Intensity and Groove Form of the Diffraction Grating – Jenny E. Rosenthal 87
Photomicrography of Silver Halide Grains with Ultraviolet Radiation – A. P. H. Trivelli and R. P. Loveland 97
Reversible Oxidation in Luminescence – Edward L. Nichols 106
Activators in Cando-Luminescence – E. L. Nichols and L. J. Boardman 115
Measurements of Thermoluminescence of Glass Exposed to Light – R. E. Nyswander and Byron E. Cohn 131
Reviews – 96, 137

APRIL

Proceedings of the Thomas Young Memorial Meeting—Fourteenth Annual Meeting of the Optical Society of America – 139
Minutes of the Executive Council – 145
Professor Edward Leamington Nichols – Ives Medallist for 1929 161
The Deflection of Light as Observed at Total Solar Eclipses – Charles Lane Poor 173
A Comparison of Laboratory and Solar Wave Lengths – Keivin Burns 212
The Observed Motion of the Perihelion of Mercury – Herbert R. Morgan 225

MAY

The Development of Thomas Young's Theory of Color Vision – Selig Hecht 231
On the Refraction of a Liquid Between Two Thin Prisms – Morton Masius and W. E. Lawton 271
The Amount of Ultraviolet Radiation Necessary to Cure Rickets – George H. Maughan and J. A. Dye 279
Modes of Vibration of a Round Plate Cut from a Quartz Crystal – A. M. Skellett 293
Graphic Symbols in Applied Optics – Noel Deisch 303

TABLE OF CONTENTS—Continued

JUNE

Officers and Council, O. S. A. — Frontispiece
Homochromatic Spectrophotometry in the Extreme Ultraviolet — George R. Harrison and Philip A. Leighton 313
Parallax Panoramagrams Made With a Large Diameter Lens — Herbert E. Ives 332
The Chromolinoscope Revived — Herbert E. Ives 343
Some Experiments in Mobile Color — G. A. Shook 354
Reviews — 330, 361

JULY

Field of View in the Oclinometer — L. E. Dodd 367
The Analysis of the Colors Observed in Photoelastic Experiments — R. V. Baud and W. D. Wright 381
Ultraviolet Radiation from the Sun and Heated Tungsten — W. E. Forsythe and Frances Christison 396
The Wave Lengths of Complementary Hues — I. H. Godlove 411
Optical Society of America, Financial Statement — 419
Journal of the Optical Society of America and Review of Scientific Instruments, Financial Statement — 421
Reviews — 422

AUGUST

Reaction of Untanned Human Skin to Ultraviolet Radiation — M. Luckiesh, L. L. Holladay and A. H. Taylor 423
Quantitative Biological Effects of Monochromatic Ultraviolet Light — Israel Weinstein 433
On the Mounting of Correcting Lenses in Visual Telescopes Used with Stellar Spectrographs — G. W. Moffitt 457
Sine-Arc and Arc-Sine Tables for Lens Calculation — C. W. Woodworth 463
Reviews — 466

SEPTEMBER

The Dispersion of Light in Metals — J. B. Nathanson 469
Contemporary Theories of Light — W. F. G. Swann 484
Reviews — 524

OCTOBER

A Spherical Projection Chart for Use in the Study of Elleptically Polarized Light — F. E. Wright 529
The Reflection and Transmission of Light by Photographic Plates — D. Brent McRae and Richard C. Tolman 565
Calibration of Standard Lamps for Relative and Absolute Measurements — L. S. Ornstein, D. Vermeulen and E. F. M. van der Held 573
Parallax Panoramagrams for Viewing by Reflected Light — Herbert E. Ives 585

NOVEMBER

Note on the Optical Constants of Manganese Distilled in Vacuum J. B. Nathanson 593
Parallax Panoramagrams made with a Large Diameter Concave Mirror — Herbert E. Ives 597
Critical Frequency Measurements in Anomalous Trichromatic Vision — H. A. Blair 601
A Comparison of the Critical Angle of Reflection and the Index of Refraction of X-rays — H. E. Stauss 616
Infrared Sensitivity of Cesium Oxide Photo-Electric Cells — James W. Ballard 618
Correlation of the Shade Numbers and Densities of Eye-Protective Glasses — W. W. Coblentz and R. Stair 624
Commercial Glass Transmitting Ultraviolet Light — Paul Davidovich 627
Reviews — 642

TABLE OF CONTENTS—Continued

DECEMBER

The Mixture Data Embodied in the Tentative Curves of Hecht's Theory of Vision – – – – – – – – – – – – – – – – DEANE B. JUDD 647

A Study of Pigment Primaries and Mixtures – – – – – FRANK F. RUPERT 661

A Suggested Method for Applying the Slitless Spectrograph to the Measurement of the Doppler Shift – – – – – – – – – – – – – – NOEL DEISCH 685

The Absorption of Radiation from Different Sources by Water and by Body Tissue – – – – – – – – – – W. E. FORSYTHE AND FRANCES CHRISTISON 693

The Filling of a Spectrograph with Light Considered as a Geometrical Radiation Problem – – – – – – – – – – – – – – J. RUD NIELSEN 701

Physical Characteristics of AC Therapeutic Carbon Arcs – R. A. SAWYER AND C. W. BYERS 719

Index to Vol. 20 – 733

OFFICERS

OF THE

OPTICAL SOCIETY OF AMERICA

FOR THE YEAR 1930

President—L. A. JONES
Eastman Kodak Company
Rochester, N. Y.

Vice-President—E. C. CRITTENDEN
Bureau of Standards
Washington, D. C.

Secretary—L. B. TUCKERMAN
Bureau of Standards
Washington, D. C.

Treasurer—ADOLPH LOMB
Rochester, N. Y.

The Council consists of the above officers, the Editor-in-Chief and the Assistant Editor-in-Chief of the JOURNAL, the past President, I. G. Priest, Bureau of Standards, Washington, D. C., and the following elected members: A. H. Compton, University of Chicago, Chicago, Illinois; I. C. Gardner, Bureau of Standards, Bureau of Standards, Washington, D. C.; P. E. Klopsteg, Central Scientific Company, Chicago, Illinois; E. D. Tillyer, American Optical Company, Southbridge, Massachusetts.

The object of the Optical Society of America is to serve the interests of all who are engaged in any branch of optics from fundamental research to the manufacture of optical goods.

The Constitution provides that anyone who has contributed materially to the advancement of optics shall be eligible to regular membership in the Society with the privilege of voting and holding office. Any individual or corporation interested in optics is eligible to associate membership.
